

Development of Moving Nest in FV3GFS: Rationale and Accomplishments

X. ZHANG^{1,2}, A. HAZELTON^{1,2}, W. RAMSTROM^{1,2}, G. ALAKA, JR.^{1,2}, H. CHEN^{1,2}, M.-C. KO^{1,2}, R. ST. FLEUR^{1,2}, S. GOPALAKRISHNAN¹, AND F. D. MARKS, JR.¹ (¹AOML/HRD & ²UM/CIMAS)

COLLABORATORS:

T. BLACK, G. GAYNO, J. ABELES, J. ALPERT, T. MCGUINNESS, A. MEHRA, AND V. TALLAPRAGADA (NCEP/EMC)

L. HARRIS, Z. LIANG, M. MORIN, M. BENDER, AND S.-J. LIN (GFDL)

Accomplished and Ongoing Tasks

2

▶ Accomplished

- ❖ Completed end-to-end nested FV3GFS installation on Theia and Jet
- ❖ Successfully tested 3-km nest forecast (7-day run) in the Atlantic basin with tropics global configuration
- ❖ Transferred hurricane analysis and forecast products & graphics (GPLOT) for HWRF-B to FV3GFS (See HWRF-B TC & forecast products in Dr. G. Alaka's talk tomorrow)
- ❖ Native grid visualization and analysis system

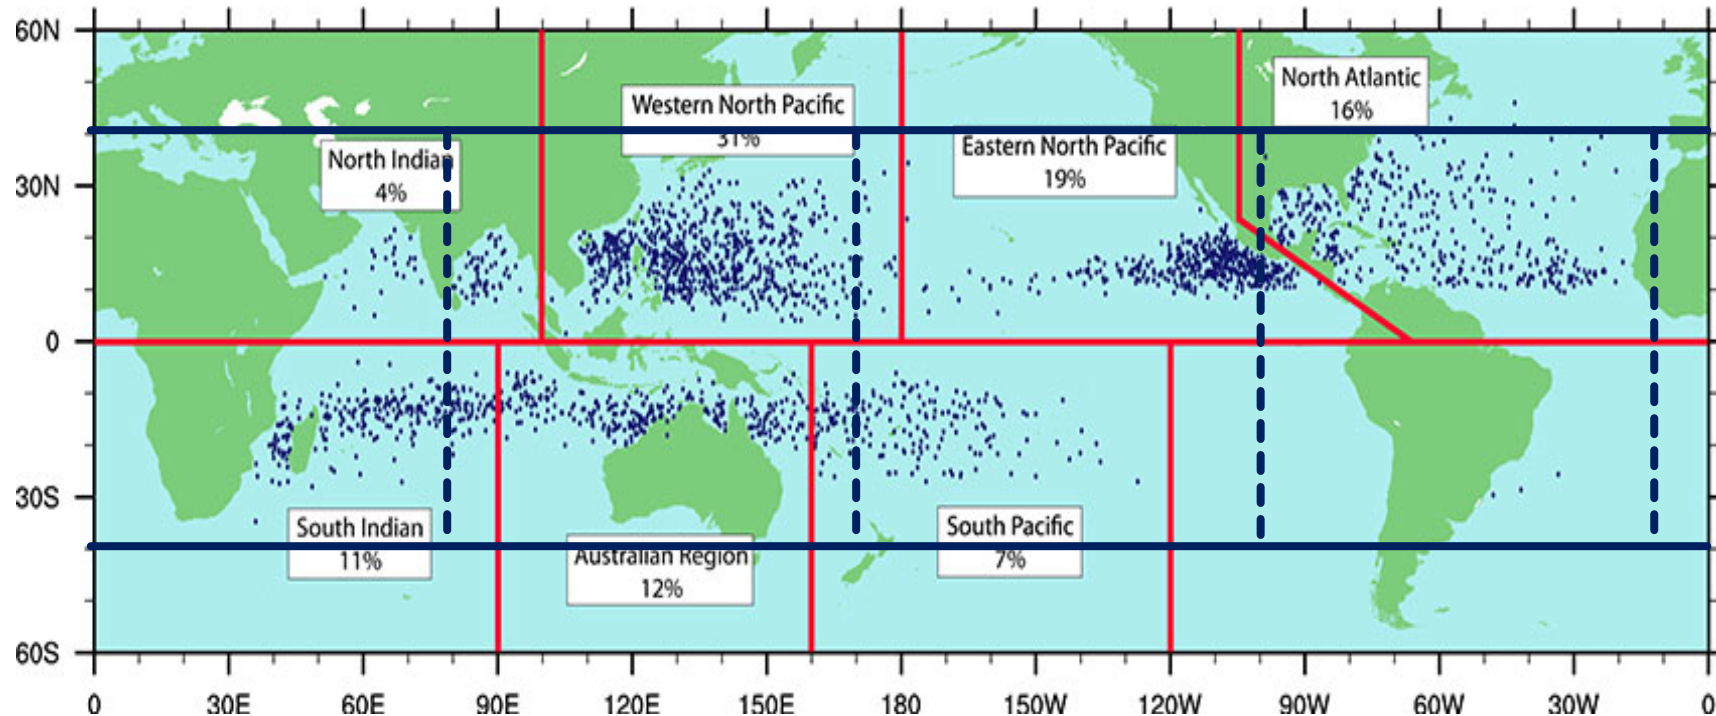

▶ Ongoing

- ❖ Developing moving nest capacity
- ❖ Evaluating physics parameterization schemes in FV3GFS with hurricane field observations and satellite data (PBL, surface layer, microphysics, etc.)
- ❖ Configuring static high-resolution nests for Eastern/Central/Western Pacific basins
- ❖ Developing ensemble capacity
- ❖ Transitioning forecast products for HWRF-B to FV3GFS (See FV3GFS TC & forecast products in Dr. A. Hazelton's talk tomorrow)

Moving Nest Approach and Global Configuration

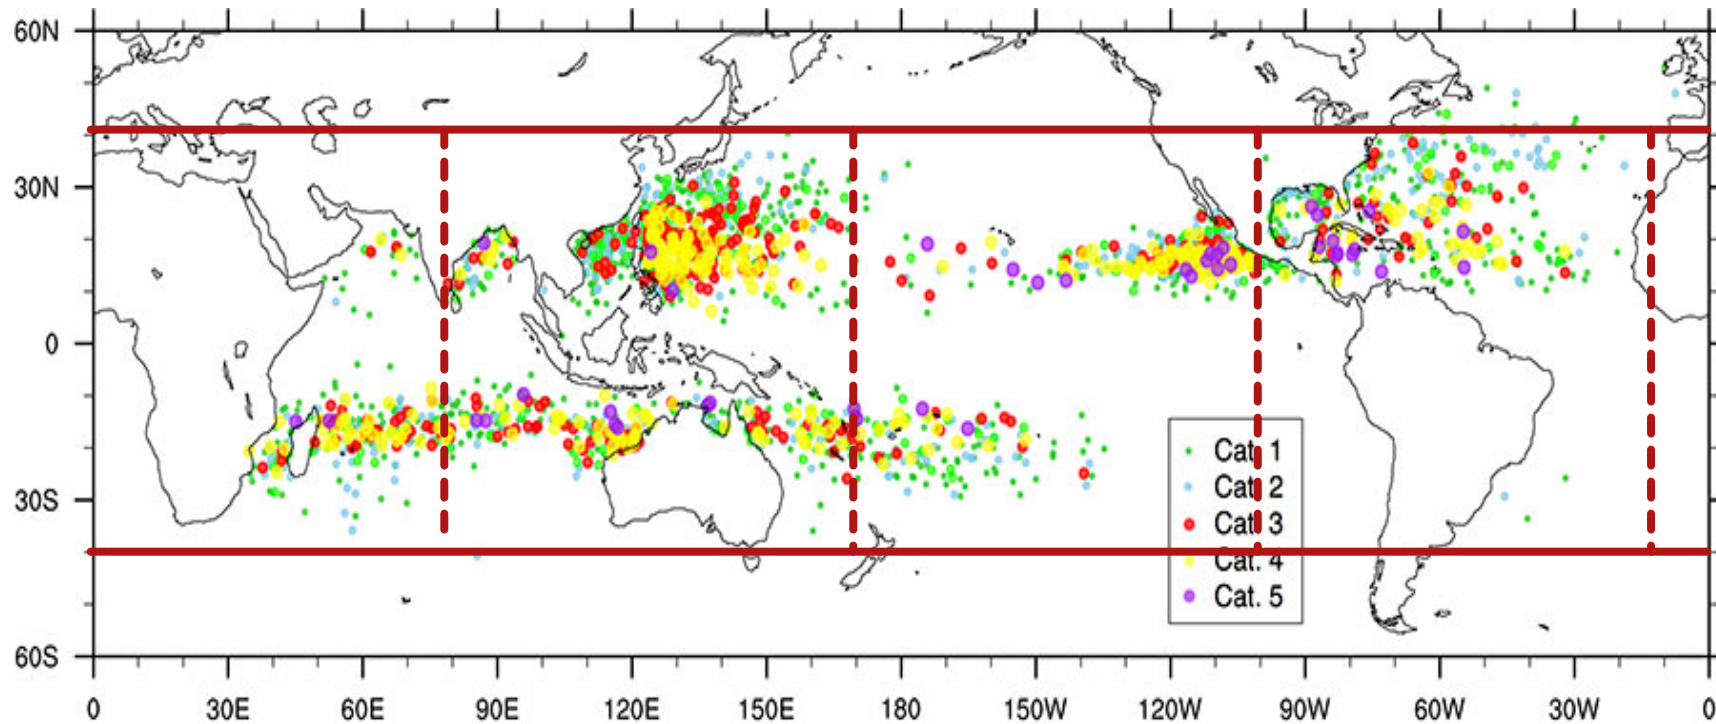

Purpose-driven development

Global Distribution of TC Genesis

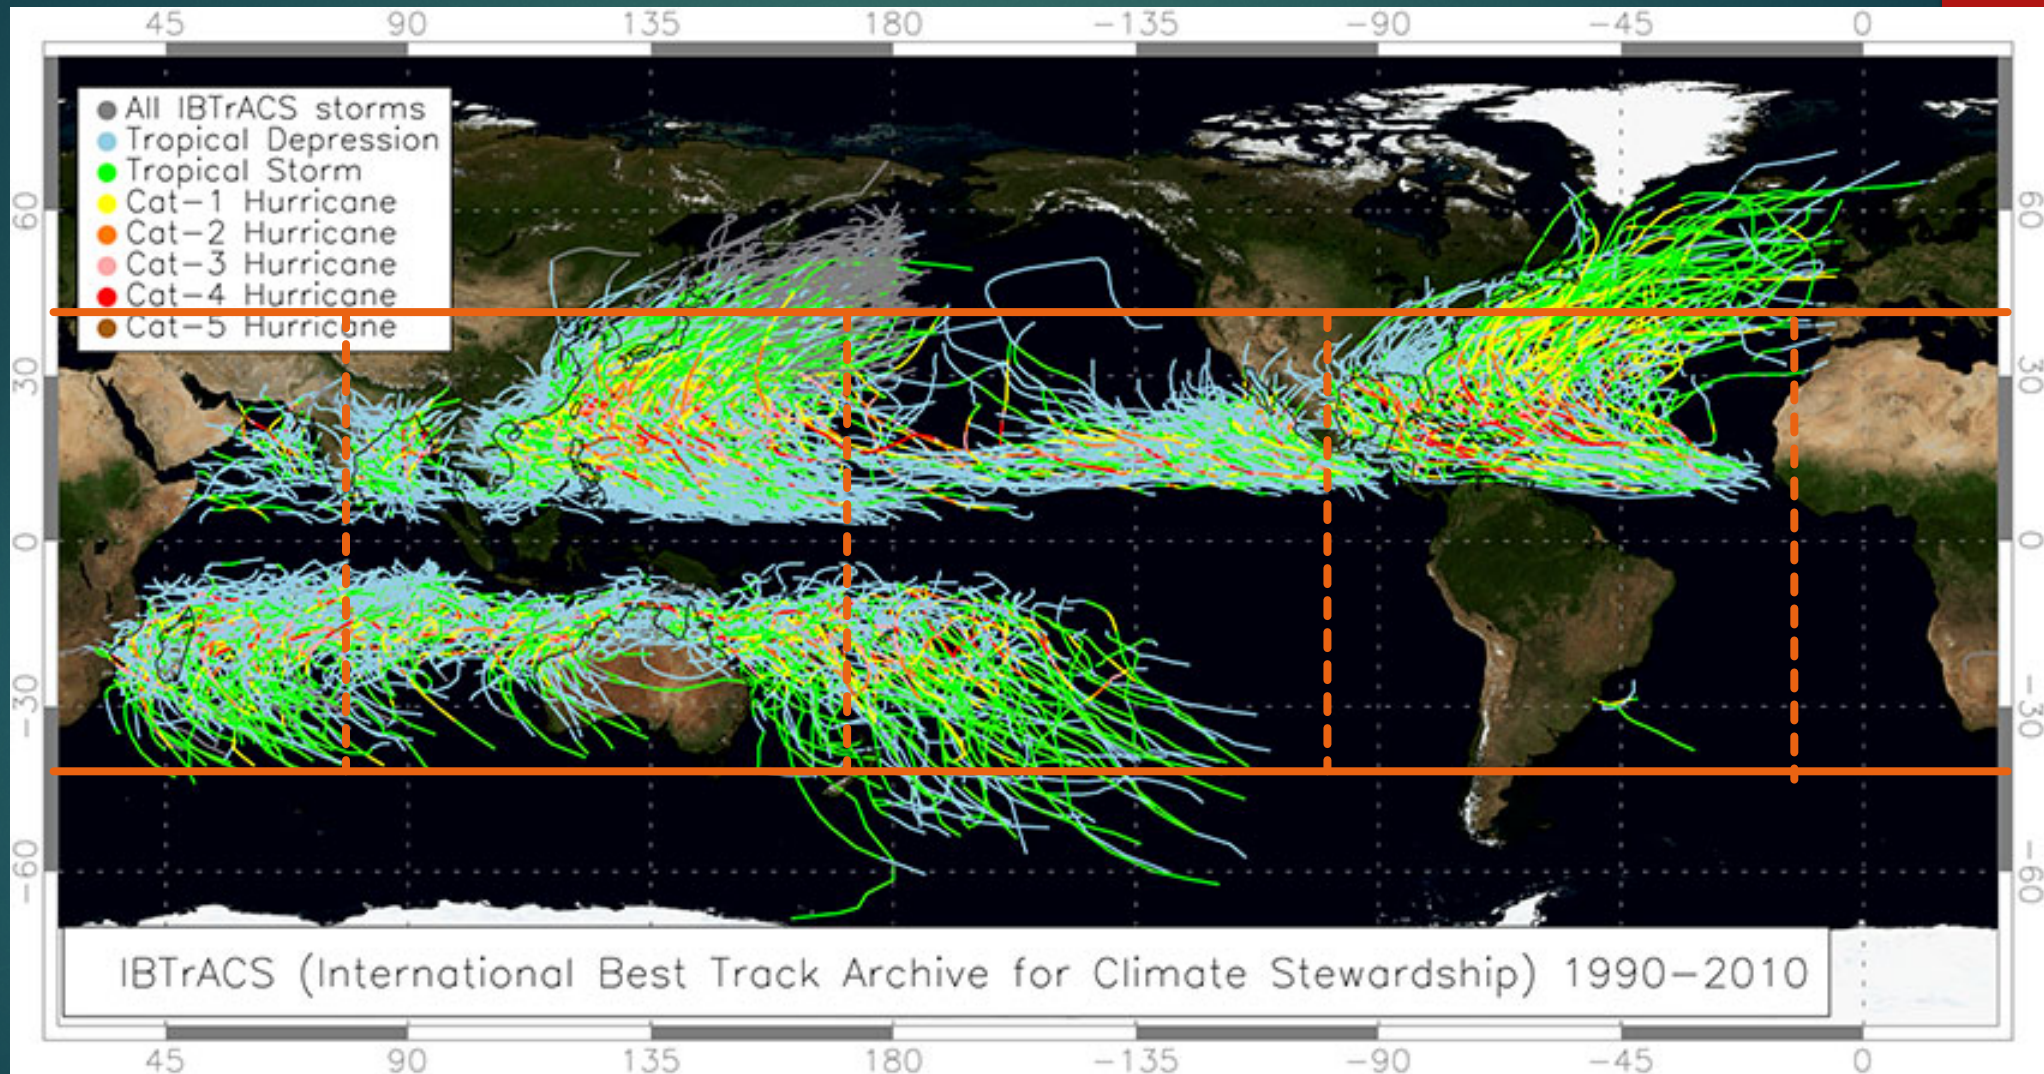

The global distribution of tropical cyclone formation points for the period of most reliable global best track data, 1985–2014. The percentage of tropical cyclones occurring in each basin (relative to the global total) is also shown based on data from 1990 to 2014

Locations of TC Lifetime Maximum Intensity

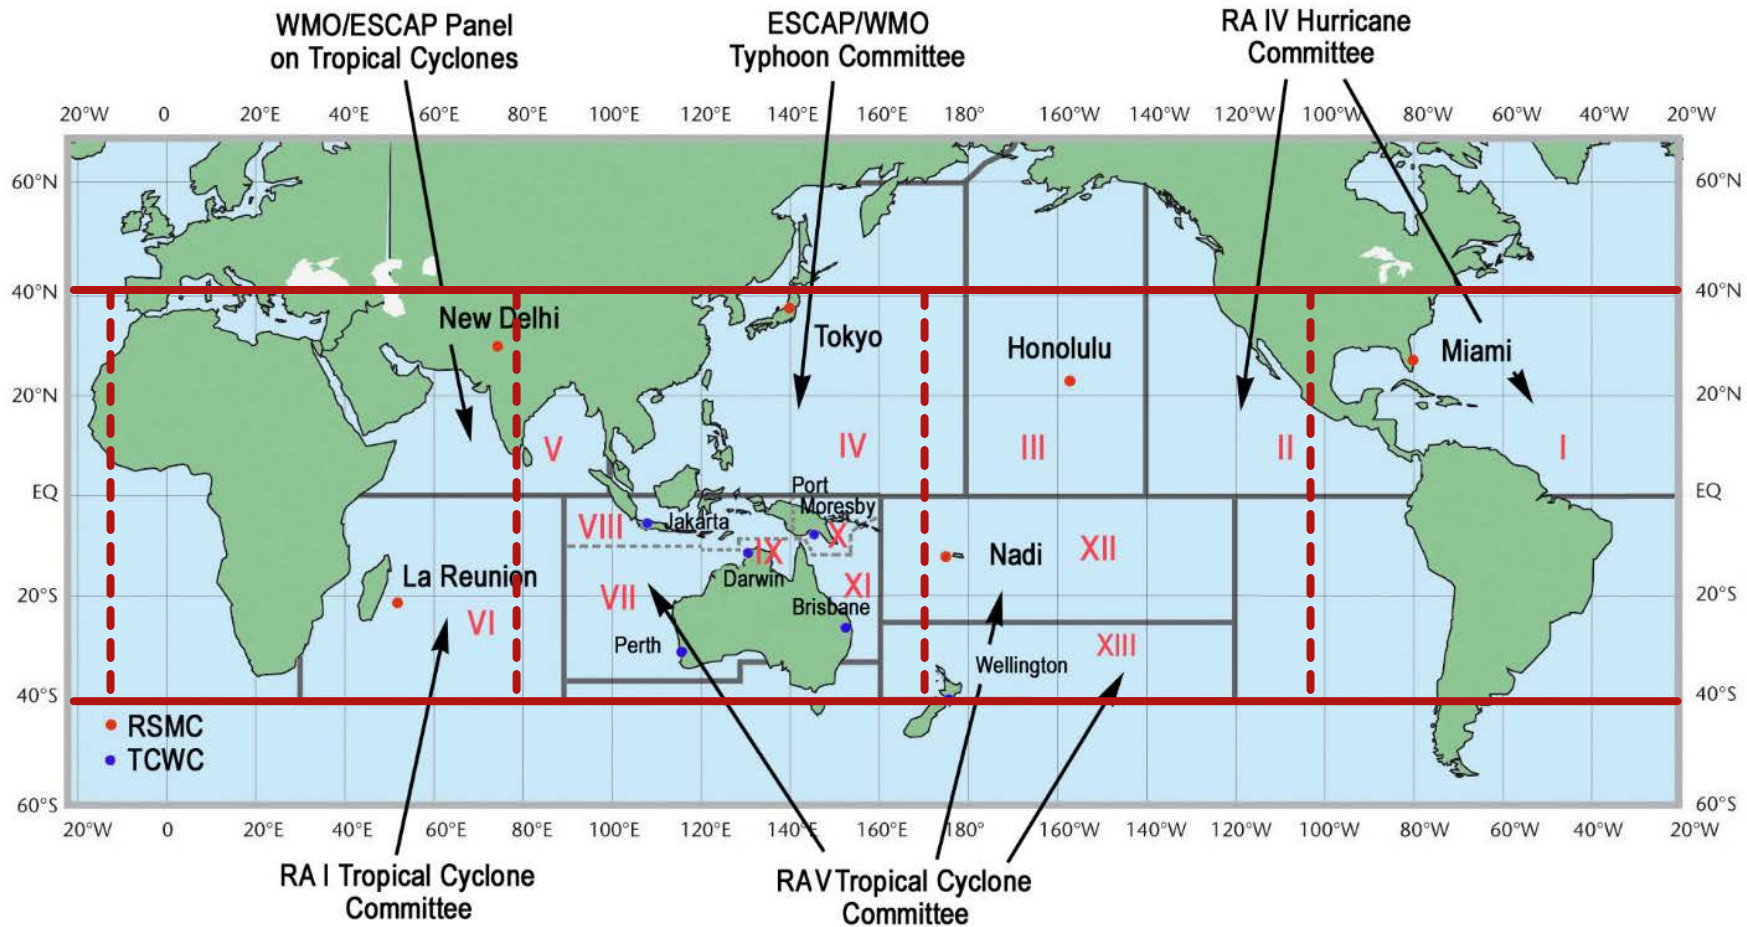

The locations of lifetime maximum intensities (LMI) of tropical cyclones for the period 1985–2014. LMI is color-coded according to category on the Saffir-Simpson Hurricane Wind Scale.

Distribution of Global TC Tracks

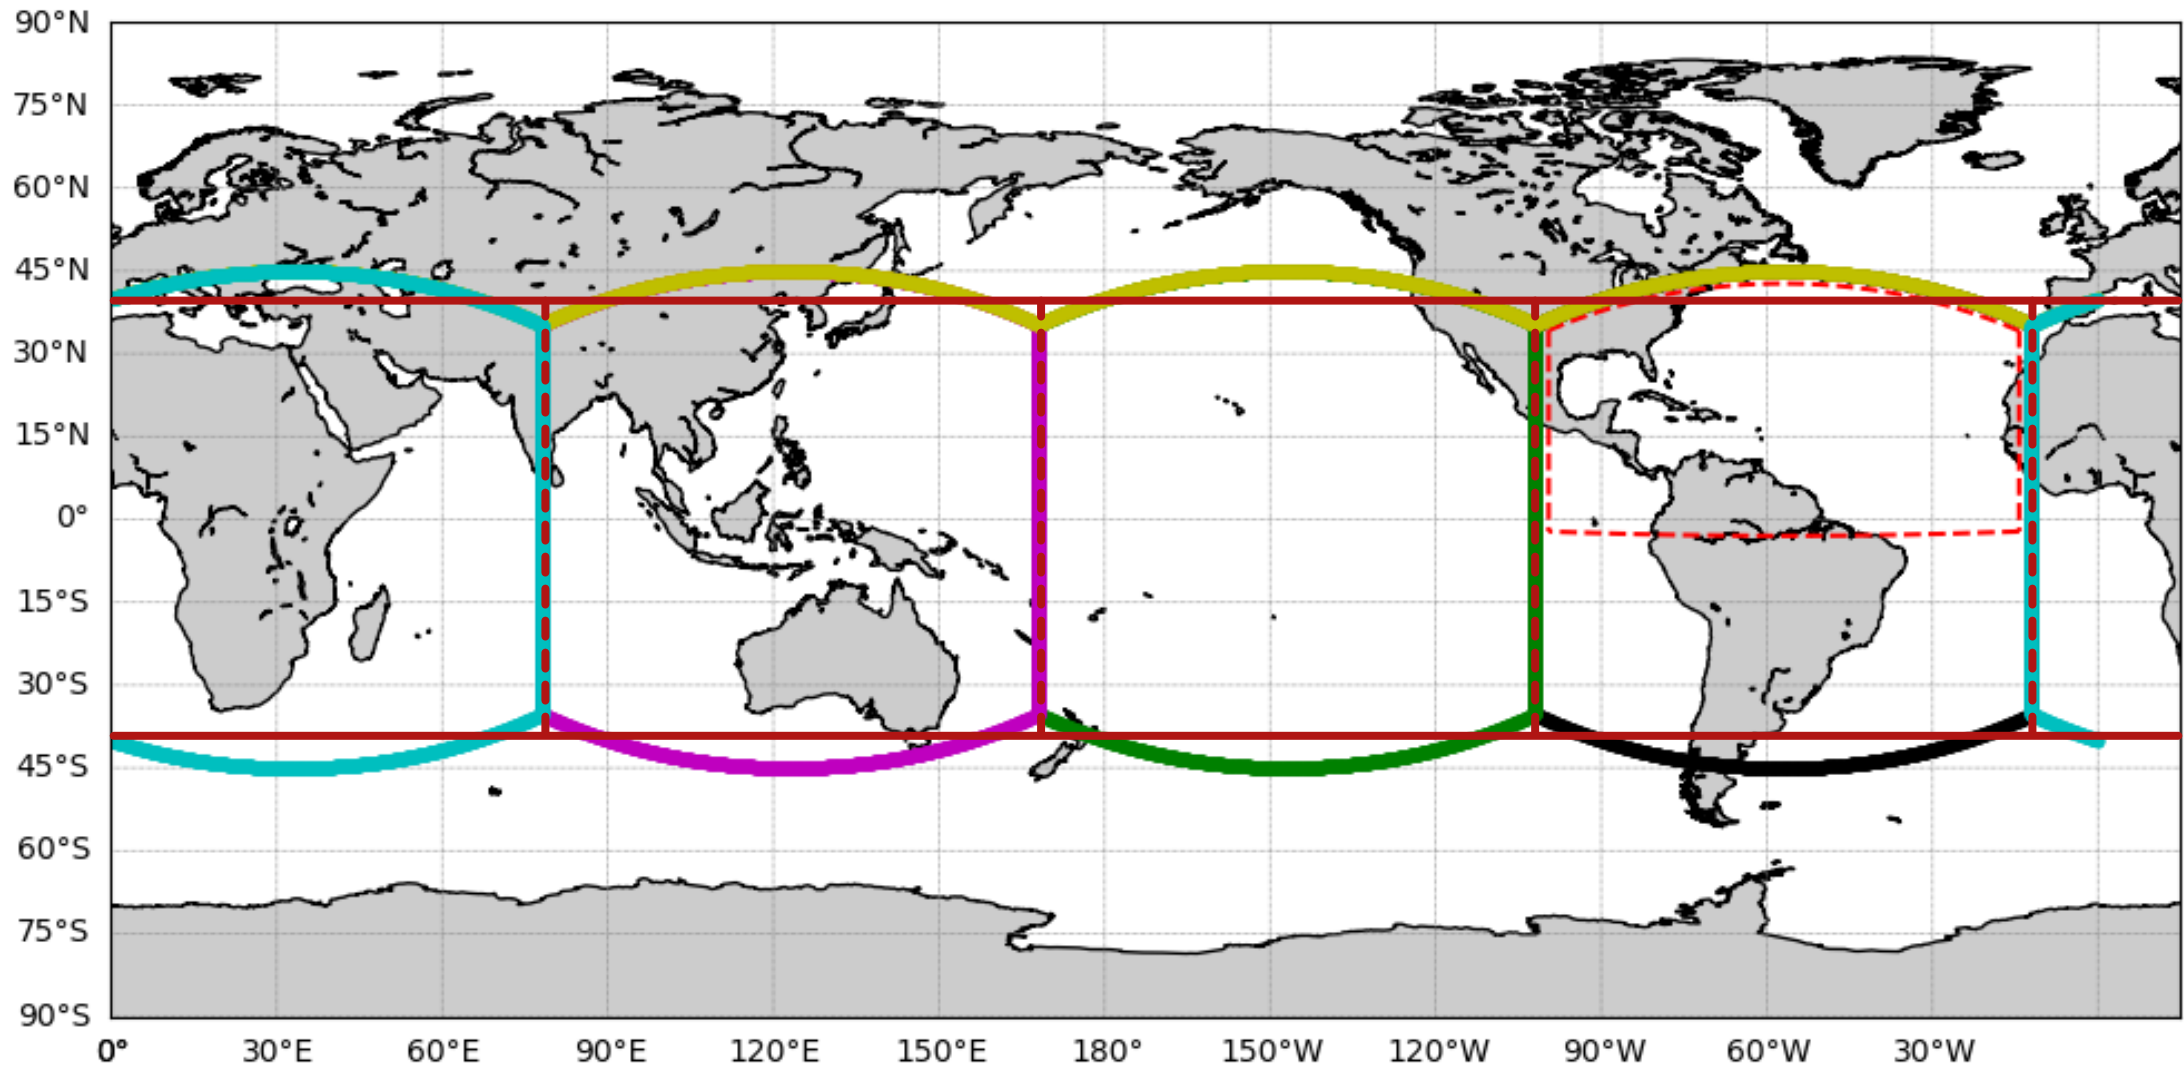

Ramsay, Hamish. 2017 "The Global Climatology of Tropical Cyclones." Oxford Research Encyclopedia of Natural Hazard Science. 15 Aug. 2018. <http://naturalhazardscience.oxfordre.com/view/10.1093/acrefore/9780199389407.001.0001/acrefore-9780199389407-e-79>.

fvGFS Surface Wind (kt)
Initialized: 2017090300 Hour 006 Valid: Sun 06Z03SEP2017

- Track is generally consistent with obs (slightly NE by Day 7)
- Storm is very intense (down to 890 hPa in the model)
- Ocean coupling needed
- Evaluation and re-calibration of global physics parameterizations in tropics needed
